

Project Manager Consultancy and Technology

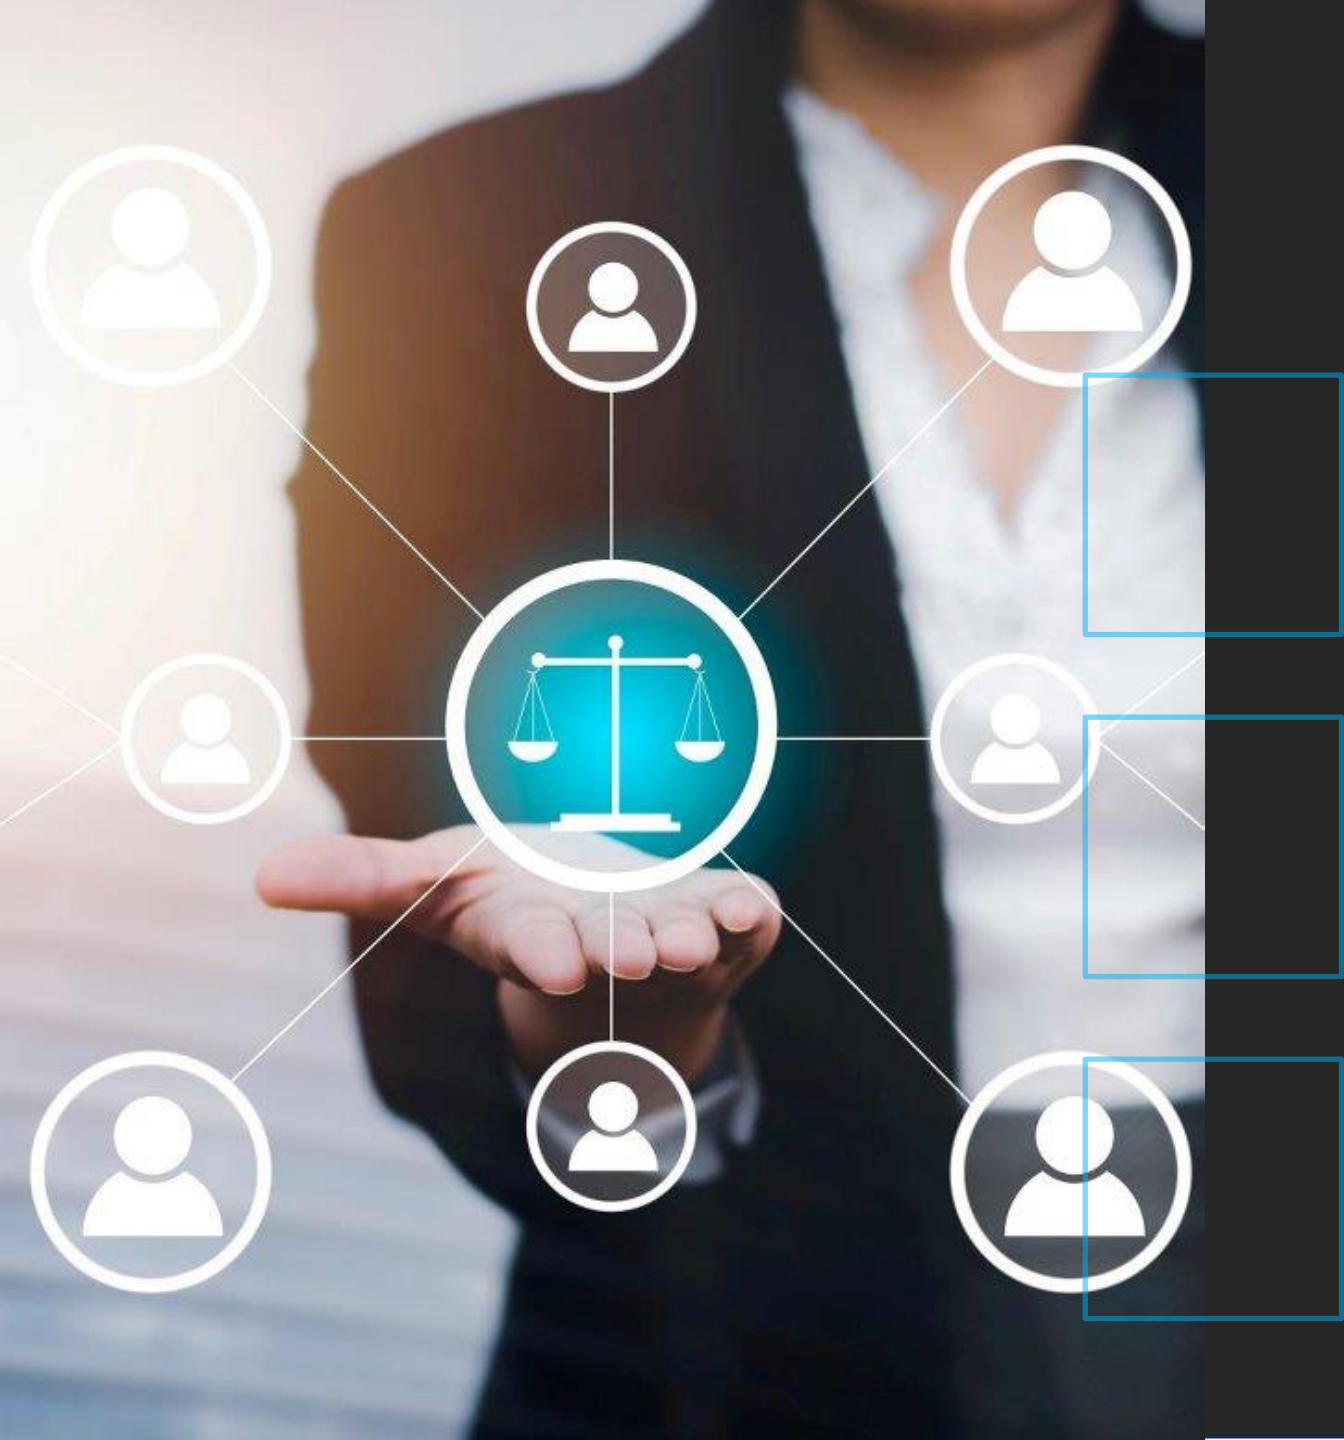

Our client provides consultancy and technology that streamlines and supports all of the company's processes across the entire value chain.

A specialist in ERP, CRM, PIM, AI, BI and e-commerce, our client broad advisory and technology insight ensures that the customer's solutions are always well thought out and integrated – and not least rooted in the customer's IT strategy.

Our client is seeking to hire 2 **Project Managers** to support its growth.

Our client is looking for an excellent software implementation project manager with a unique combination of **technical, leadership, communication, and organizational skills** while maintaining strong relationships with team and clients.

Responsibilities include delivery of Microsoft implementation programs to clients, all aspects of that implementation, as well as contributing to the further build of the practice, including sales and marketing.

The Role, at a glance

The ideal candidate has:

- Strong organisational and planning skills
- Experience with Agile and/or Waterfall Methodologies and Technical understanding.
- A customer-focused approach
- Experience in leadership and team management
- Experience in budget and resource management
- ...
